OMKAR SANTOSH AWARE

Junior DevOps & Cloud Engineer | CI/CD Automation | Linux | AWS | System Engineer

Pune, Maharashtra | +91 8767704634 | omkaraware1301@gmail.com

LinkedIn: linkedin.com/in/omkar-aware | GitHub: github.com/omkarawaregithub

PROFESSIONAL SUMMARY

Computer Science postgraduate and Software Engineer Trainee (DevOps) with hands-on experience in CI/CD automation, Linux administration, Java/Spring Boot application deployment, containerization, and AWS cloud environments. Skilled in Jenkins, Git, Docker, Maven, AWS EC2, Amazon ECR, and DevSecOps tools including SonarQube, Trivy, and OWASP ZAP. Experienced in building automated deployment pipelines, troubleshooting deployments, and automating AWS infrastructure tasks using Jenkins and Python. Familiar with Kubernetes and Terraform fundamentals, networking, and cloud infrastructure, with an interest in reliable application and cloud operations.

PROFESSIONAL EXPERIENCE

Software Engineer Trainee (DevOps) | Jijau Software Pvt. Ltd. *September 2025 – Present*

- Worked with Jenkins, Docker, Git, Maven, Linux, and AWS for application deployment.
- Assisted in building and maintaining automated Jenkins CI/CD pipelines.
- Containerized Spring Boot applications and supported Kubernetes deployments.
- Managed Git/GitHub repositories, branching, and version control.
- Integrated SonarQube, Nexus, Trivy, and OWASP ZAP into development workflows.
- Deployed Java applications on Linux and AWS EC2 and performed troubleshooting.

PROJECTS

Automated Maven DevSecOps Pipeline with OWASP ZAP

Technologies: Jenkins, Git, Maven, Java, Spring Boot, Docker, AWS EC2, ECR, SonarQube, Nexus, Trivy, OWASP ZAP

- Built a Jenkins CI/CD pipeline for a Maven-based Spring Boot application, automating build, testing, code analysis, security scanning, and packaging.
- Integrated SonarQube, Trivy, and OWASP ZAP for code-quality and security validation.
- Built Docker images, pushed versioned images to Amazon ECR, and used GitHub webhooks for automated pipeline triggers.
- Deployed and tested the application on AWS EC2; worked on deployment and pipeline troubleshooting.

AWS EC2 Auto-Stop Automation

Technologies: AWS EC2, IAM, Jenkins, Python, Linux, Git/GitHub

- Automated scheduled AWS EC2 instance shutdown using Jenkins and Python.
- Used IAM roles with least-privilege permissions and tag-based instance selection.
- Executed automation on a Jenkins Linux Agent using a Python virtual environment.
- Added error handling, logging, and workspace cleanup to the automation workflow.

TECHNICAL SKILLS

- **Cloud & Infrastructure:** AWS EC2, IAM (Basics), Amazon ECR, Terraform (Basics)
- **CI/CD & Version Control:** Jenkins, Git, GitHub, Maven
- **Containers & Orchestration:** Docker, Docker Compose, Kubernetes (Basics)
- **Linux & Operating Systems:** Ubuntu Linux, Windows
- **Programming & Automation:** Python (Basics), Java (Basics), Shell Scripting (Basics)
- **DevSecOps & Artifacts:** SonarQube, Trivy, OWASP ZAP, Nexus, JFrog Artifactory
- **Core Concepts:** CI/CD pipelines, application deployment, troubleshooting, networking fundamentals, automation
- **Project Practices:** Jira, Agile/Scrum, Kanban

EDUCATION

Master of Science (M.Sc.) – Computer Science 2023 – 2025

Yashwantrao Chavan Institute of Science, Satara | Score: 77.59%

Bachelor of Science (B.Sc.) – Computer Science 2020 – 2023

Yashwantrao Chavan Institute of Science, Satara | Score: 69.85%
